

PayGenius is a fintech startup offering e-commerce merchants a simple platform to accept online payments. Our mission is to simplify and automate payments in Africa.

### **Position: Backend Developer**

We are looking for an experienced backend developer to maintain our infrastructure, improve the existing products and help us drive innovation in the space through various enhancements.

Our tech stack is based on Java and php. We use the Laravel Framework.

The candidate must have a proven track record of delivering great tech software in a fast pace environment, have an entrepreneurial spirit, good communication skills, self awareness and high professional standards.

#### **Your mission**

- Maintain the PayGenius platform and its documentation
- Answer integration queries from merchants
- Develop enhancements to the platforms (backend and frontend) with the help of our tech partner Methys
- Stay up to date with current innovations in the industry and help deliver innovative solution within the PayGenius stack

#### **Your profile**

- Knowledge of java, php, laravel essential
- Ability to set priorities and deliver on time
- Excellent communication (oral and written), interpersonal and organizational skills
- Ability to learn and adapt quickly in a fast pace environment
- Strong analytical skills
- Goal and results oriented individual
- Proficiency of English language essential

#### **Perks:**

- Great free coffee & awesome location, close to Canal Walk
- Attendance to local tech conferences and hackaton
- Part of the FSATLabs incubator & accelerator, surrounded by great tech entrepreneurs
- Exposure to a multi-cultural team operating in various countries (France, Tunisia and SA)
- Opportunity to grow in a CTO position

The candidate will report directly to the CEO and work closely with our technology partner Methys. The position is based in our Century City office, with occasional travels to the Stellenbosch tech office for support.

The candidate must have his own transport.
