

FESTIVAL ORGANIZER

The day that takes place the final of volleyball with the two winner teams in the league, will take place a party in the pavilion to celebrate this, in which all the students of the secondary school can to attend there.

For this day, the persons that take charge of organize the party are the persons of each group that have the role of festival organizer (one for group), so we have done a group of WhatsApp and here, we talk about all the things about the party.

-COLLECTED MONEY

In order to buy all the things that we need to prepare the party, we thought of each person put 1.50 euros. To collect this money easier, each one gave the money to the festival organizer of his team and we took care of put all the money together.

-FOOD

In the party, obviously there has to be food for the players and for the students that will be present there, so we have thought to buy the food that I have put up continuation:

HEALTHY FOOD

-Different fresh fruit (bananas, apples, pears, clementine...)

-Different dried fruit/nuts (walnuts, almonds, pistachios...)

UNHEALTHY FOOD

-Bags of potatoes, Cheetos, gusanitos...

-DRINK

To drink, we have thought to buy water, juices of different flavours, fanta (lemon and clementine), coca-cola...

-IMPORTANT THINGS

In addition, for all this, we need to bring a table and buy glasses, dishes and everything necessary for that day. Also, we have thought that it is important that we buy rubbish bags to use as a rubbish bin and for make easier and cleaner when we picking up all of the party. One thing that I think is very important too, is the music for give a better environmental. We don't have thought the music yet, but there will be.

-AWARDS

Regarding to the awards, we have thought about organize it in this way:

-For all the participants in the league of volleyball: we will make diplomas and buy medals, in total approximately 45 medals and diplomas, but we have thought that we could make two more diplomas for our teachers.

-For the team in the second position: we will buy chocolate or something like that.

-For the winner team: we will buy a trophy and maybe chocolate or something like that, just like the team that's in the second position.

While the matches are played, we will do some games to the students that will be present there and the winners of this games will be to award with chocolate, sweets or something like that.

-SELF EVALUATION

My team, Miuras, made it easier for me to develop my role, such as when I asked for the money, all of them, the next day, bring me it and never put any complaint... I haven't got any complaint with my team, because there is a good environmental and companionship, although obviously we can improve a lot of things for playing better, for example, the communication among us. From the first moment we understood each other and we have dedicated to try to improve and help each one. In my opinion, this is one of the basic things that a team should have since this helps players to enjoy playing and that they like the sport.

Respect with persons that have the same role as me, I think that there could be more organization and we must improve the coordination, so we must reach an agreement in everything and we have different opinions.

Other thing that I think we must improve is the job, that is to say, work all equality, especially, in give our opinion, because I think that in this role, this is one of the most important things, so how I said before, we must to reach an agreement and discuss among all, and we must know what is the thing that our partners think about something for improve easily.

In spite of this, I think that we are developing our role correctly, although improvement. As our job is shown the day of the final, we can't know how will to be, but if things continue like now, I think that the party will be fantastic.
